The world's largest & richest microbiome dataset

powers our blood sugar prediction engine

- ✓ One million food items /meals
- ✓ Pre-built or build meal options
- ✓ Micro & macro nutrient tracking

Why it works: People respond differently to the same foods

One-size-fits-all diets do not work. Monitoring the disease does not work.

Medication slows the disease, but does not stop it. **Precision Nutrition is the solution.**

How it works

Microbiome

Unprecedented insights into unique food digestion

+

AI Predictions

+

Predict individual blood sugar response to any food

Virtual Care

1:1 video and text coaching with Registered Dietitians

"The clinical outcomes were phenomenal. I'll be honest, I was amazed! We saw one particular member's A1C drop from 11.0 to 6.3, that's a drop of almost 5."
